5. (New) A stacked semiconductor chip package comprising:

a substrate;

a first chip, mounted on the substrate and electrically connected to the substrate by a plurality of electrical leads;

a second chip, electrically connected to the substrate by a plurality of electrical leads and having two opposed longitudinal sides defining a first length; and

a plate, mounted between the first chip and the second chip and connected the first chip and the second chip, corresponding to the two longitudinal sides of the second chip, the plate having two opposed longitudinal sides defining a second length, the second length being larger than the first length to expose the opposed longitudinal sides of the plate.

A

6. (New) The stacked semiconductor chip package according to Claim 5, wherein corresponding to the two longitudinal sides of the second chip, the first chip has two opposed longitudinal sides defining a third length, and the third length is larger than the second length.

7. (New) The stacked semiconductor chip package according to Claim 5, wherein corresponding to the two longitudinal sides of the second chip, the second chip further has two opposed transverse sides defining a first width, the plate further has two opposed transverse sides defining a second width, the second width is smaller than the first width.

8. (New) The stacked semiconductor chip package according to Claim 7, wherein the first chip further has two opposed transverse sides defining a third width, and the second width is smaller than the third width.

Q1

9. (New) The stacked semiconductor chip package according to Claim 6, wherein corresponding to the two longitudinal sides of the second chip, the second chip further has two opposed transverse sides defining a first width, the plate further has two opposed transverse sides defining a second width, the second width is smaller than the first width.

10. (New) The stacked semiconductor chip package according to Claim 9, wherein the first chip further has two opposed transverse sides defining a third width, and the second width is smaller than the third width.

IN THE ABSTRACT:

Please substitute the Abstract on the last separate page hereof.

Remarks

Claims 5-10 correspond exactly to original claims 1-4 and are being provided only as a clearer copy and also for the purpose of avoiding claim fees that would otherwise accrue due to the presence of multiple dependent claims.

Respectfully submitted,
